DETAILED ACTION

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's amendments have overcome the 112 rejection of the previous office action. Further, Applicant's arguments have persuaded the Examiner not to make the same 112 rejection of the previous office action in regard to new claims 13 and 15. Specifically, Applicant has argued that the recitation of "to receive a porous element fully across the path" in claims 13 and 15 does not introduce a porous element as a further element of the claim, but rather merely adds description further defining the porous element mount (Applicant's remarks, page 7). In light of this explanation the claims are allowed.

As stated in the previous office action, the reasons for allowance are as follows:

Claims 1 and 13 recite a detector for breaks in porous element for a material separator which includes a transmitter of a RF signal and a receiver of a RF signal. None of the prior art of record discloses a detector for breaks in the porous element which uses a RF signal.

US Patent No. 5,996,807 to Rumpf et al. discloses a screening device which detects breaks in a screening element. However, Rumpf discloses detecting the breaks using conductive threads wherein a break in the thread would be indicated by a sudden increase in the electrical resistance. Rumpf does not disclose or suggest using an RF signal.

Claims 5, 15 and 10 also require the use of RF signals.

Claim 9 requires a microwave signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

Claims 1-16 are allowed.
